generated electricity per year with 57,000 m² of own photovoltaic installations. This corresponds to the electricity needs of 1,910 households

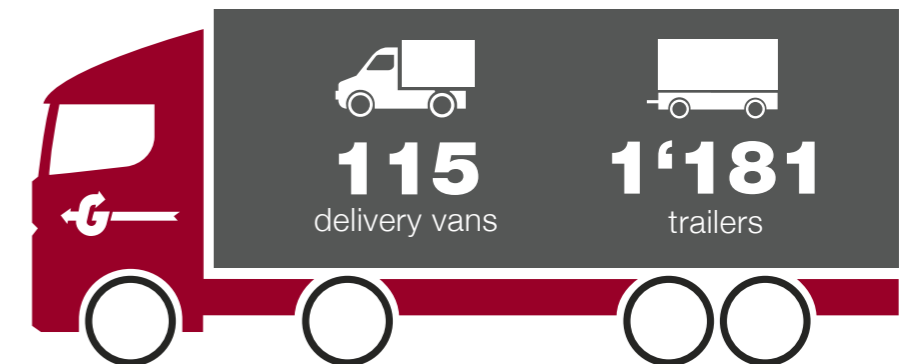

18'000

open and covered parking spaces for customer vehicles in the Car Logistics division

21 BRANCHES
in 6 countries

1'165
trucks

GALLIKER

AT HOME IN THE HEART OF SWITZERLAND

Car Logistics, Nebikon

Logistics Centre 4-6, Dagmersellen

HEADQUARTERS ALTISHOFEN

Our head office extends over the three municipalities of Altishofen, Nebikon and Dagmersellen. With direct access to the A2 motorway and the Gotthard railway line, Galliker is ideally located in terms of transport and is ideally served by road and rail.

Logistics Centre 1-3, Altishofen/Dagmersellen

SUSTAINABLE THANKS TO OUR OWN NETWORK

NATIONAL TRANSPORTS

The strategic network of Galliker's eleven national branches with direct rail connections enables efficient and sustainable provision of transport and logistics solutions by road and rail.

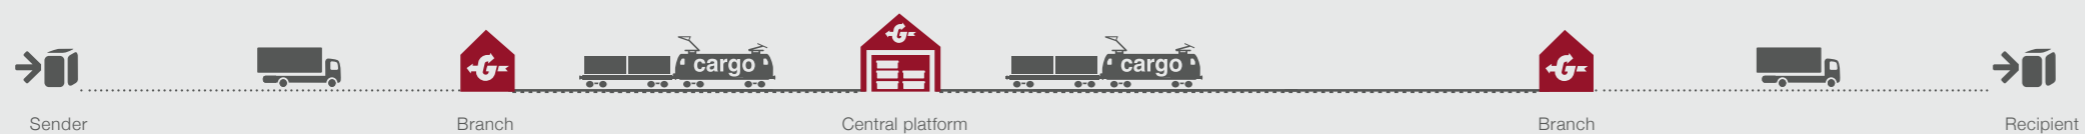

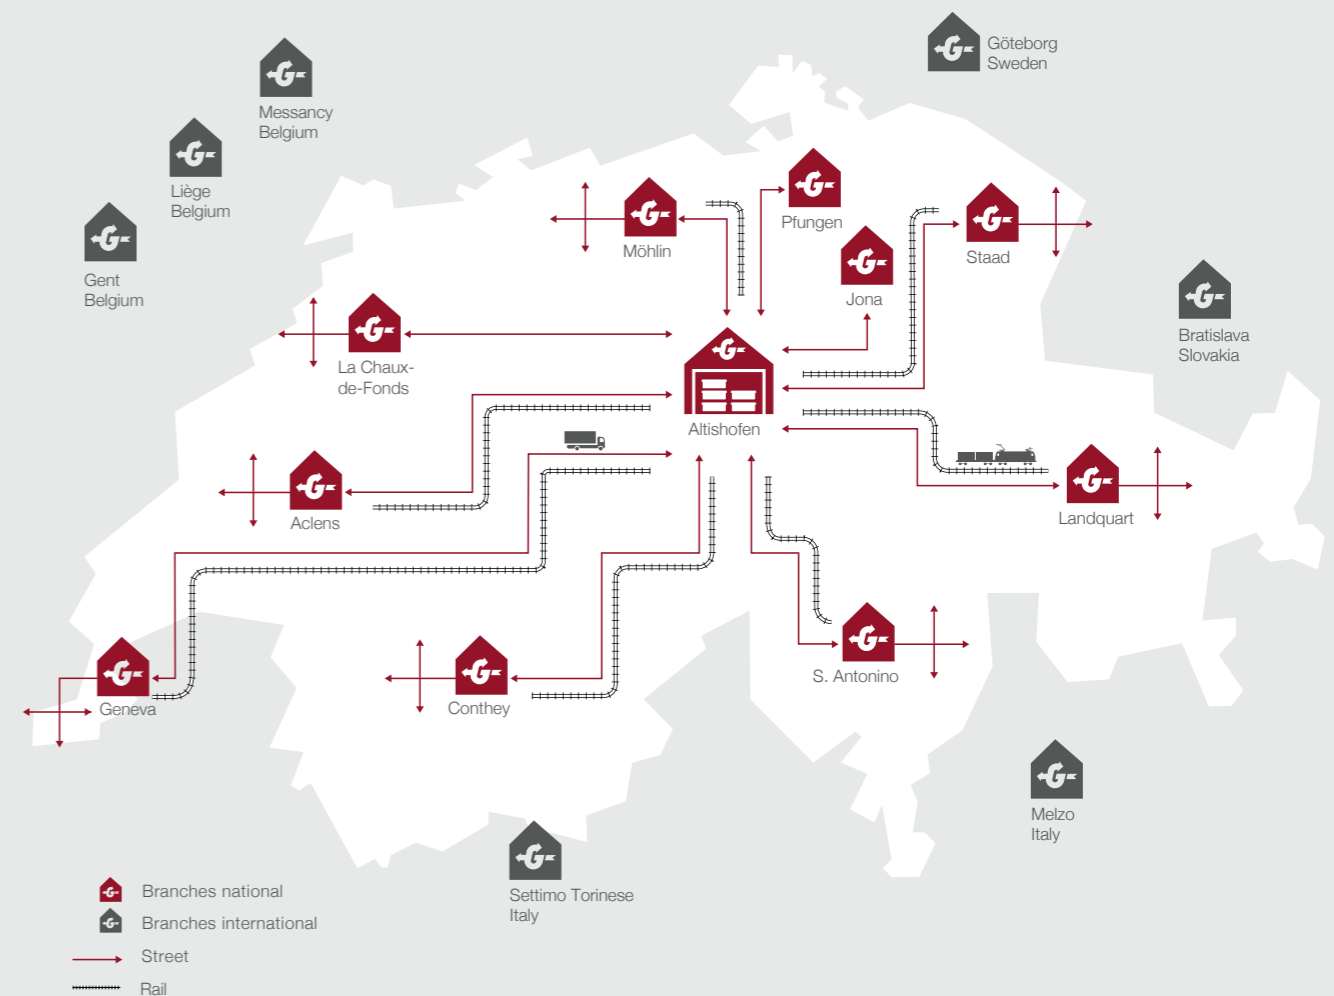

With direct access to the Galliker branches on the Swiss railway network, Galliker is focusing on combined road and rail transport. The central hub in the national distribution network is located at the headquarters in Altishofen. With eleven branches Galliker is ideally placed to supply its customers as quickly as possible and with a high level of efficiency.

JUST IN TIME FROM A TO Z

The goods are collected from the sender by truck. It then transports the goods to the nearest Galliker branch. During the night, the goods are then distributed by rail, after which the trucks take over the fine distribution to the consignee at the corresponding branch.

INTERNATIONAL TRANSPORTS

Our seven international branches form the foundation for international transports on our main axis Scandinavia - Belgium - Switzerland - Italy. On this axis, we are on the road every day with our fleet of trucks, flexibly and variably with full and part loads in different temperature zones.

NATIONAL AND INTERNATIONAL BRANCHES

Food/Fresh/Parts Logistics, Möhlin branch

Rail container terminal, S. Antonino branch

Flower Logistics, Möhlin branch

Fresh Logistics, Möhlin branch

Logistics Centre, Staad branch

International hub, Milmort (BE) branch

GALLIKER BRANCHES

In our national and international branches we provide daily a wide range of services in in the various temperature ranges, according to customer requirements.

Crane loading, Staad branch

Logistics Centre 4, Dagmersellen

International distribution platform, Melzo (IT) branch

GALLIKER BEYOND LOGISTICS

Thanks to many years of experience, close cooperation with our customers in a spirit of partnership and an innovative mindset, Galliker has developed a wide range of services. Every day, we provide national and international transport and logistics services in line with individual customer needs and requirements. This includes a wide range of value-added services. This enables us to offer our customers an exclusive full service from production to the recipient – safely, flexibly and punctually.

HEALTHCARE LOGISTICS

IN THE SERVICE OF HEALTH

Transport, storage and commissioning of medical and pharmaceutical products as well as medical devices place the highest demands on safety, reliability and quality.

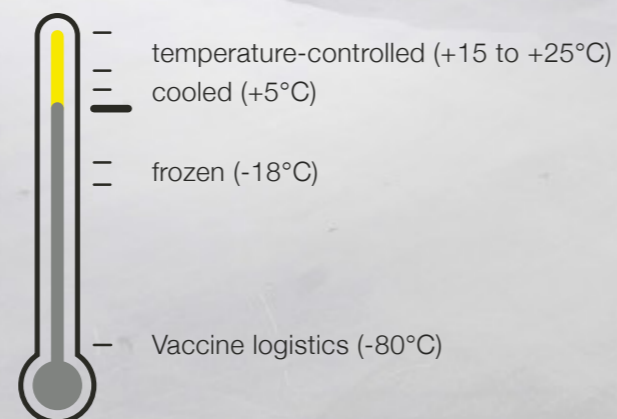

Employees specially qualified for handling pharmaceutical products, state-of-the-art logistics facilities and vehicles, combined with intelligent IT systems, form the basis for logistics solutions that are individually tailored to customer needs in accordance with GDP/GMP guidelines.

With vehicles specially designed for this purpose and special temperature zones in the goods-handling and storage areas, we guarantee flawless transport in consistent compliance with the temperature specifications. We collect the goods from our customers today and deliver them to the desired recipient the next day.

Philippe Linder

Head of Purchasing & Logistics,
Luzerner Kantonsspital

**We feel your
desired temperature**

With the newly created central warehouse at the Galliker company, and in addition to the established sterile and food transports, we supply all our locations with medical consumables. This comprehensive partnership sets new standards in hospital supply in the Swiss healthcare system.

HEALTHCARE LOGISTICS

As a specialist for medical and pharmaceutical logistics we bear a great responsibility in supplying hospitals and pharmacies as well as patients at home.

Compliance with product safety and quality is of central importance in the field of healthcare logistics. Even the slightest quality deviations have a direct impact on the health of the patient. Therefore, all activities are carried out in strict compliance with the highest safety standards.

HIGHEST QUALITY AND SAFETY STANDARDS

- ✓ Swissmedic
- ✓ GDP/GMP
- ✓ ISO 14001
- ✓ ISO 9001

Mischa Uehlinger
Galliker Healthcare driver since 2012

I'm proud to transport vital, sensitive pharmaceutical products every day. I appreciate the personal customer contact. The diversity of our customers, from village pharmacies to university hospitals, makes my daily routine exciting and varied again and again.

FOOD / FRIGO / FRESH LOGISTICS

CONTINUOUS COLD CHAIN IN THREE TEMPERATURE ZONES

As the market leader in the field of food logistics in Switzerland, we store, pick and pack goods in all desired temperature zones. The continuous cold chain covers the entire process – from receipt of the goods to delivery to the end customer. Galliker has many years of expertise in food logistics and offers its customers along the supply chain efficient and individual logistics solutions in various temperature ranges.

CO-PACKING BY GALLIKER

- › Display construction
- › Packaging
- › Multipack production
- › Labelling and price marking

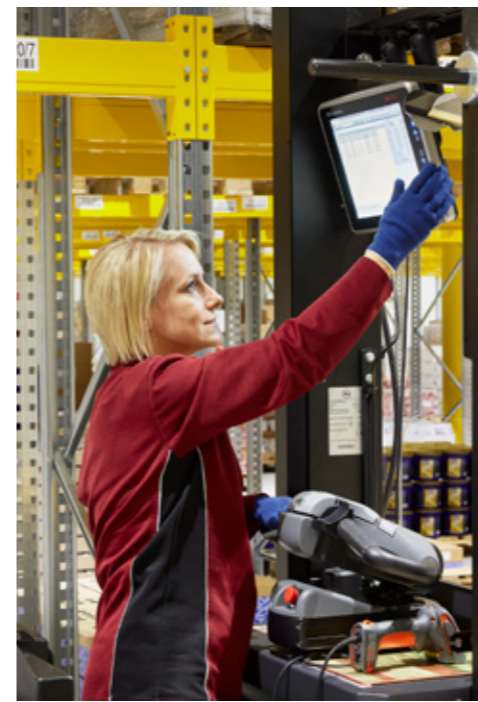

Thomas Ackermann
Director Supply Chain Management, Kambly SA

Temperature ranges

Ambience	15–18 °C
Fresh	2–5 °C
Frigo	–18 °C

Kambly has been relying on Galliker's logistics services for two decades. The same values shared by the two family-owned companies form the foundation of this successful partnership. Motivated and competent employees on both sides enable the implementation of challenging logistics projects, all with the goal of efficient and customer-oriented logistics.

EFFICIENT STORAGE AND RETRIEVAL THANKS TO FULLY AUTOMATED HIGH-BAY STORAGE SYSTEMS

Peter Galliker
CEO Galliker Transport AG

With the combination of our competent specialists and the partially and fully automated logistics processes, we achieve a high level of efficiency in the processes and still retain the flexibility to meet our customers' individual needs.

CARGO LOGISTICS

GALLIKER – JUST IN TIME

Galliker's own branch network enables a smooth 24-hour collection and delivery service to transport goods throughout Switzerland. Picked up today, moved by rail overnight between the individual branches, delivered on time the next day in the distribution as requested. Our friendly, experienced Galliker employees deliver the diverse consignments to the right place on time, whether in the remote Alpine valley or in a vibrant city centre. Professional warehousing and specific value-added services round off our comprehensive range of services in the areas of:

- › Cargo Logistics
- › Parts Logistics
- › Bike Logistics
- › Walking Floor Logistics

André Köpfli

Director National Transports, Galliker Transport AG

To successfully provide transport and logistics services, Galliker relies on high-performance, secure and state-of-the-art IT systems in addition to motivated and competent employees and a modern fleet of vehicles.

App and system solutions specially developed for this purpose enable efficient and individual mapping of our diverse needs, digitised from A to Z.

FOR EVERY PRODUCT THE RIGHT SOLUTION

PARTS LOGISTICS

- › 24-hour pick-up and delivery service for spare parts from production facilities in Europe to the garage in Switzerland
- › International and national transports incl. customs clearance
- › Management of the national spare parts warehouse
- › Twice a day delivery to the dealer network throughout Switzerland

BIKE LOGISTICS

- › International & national transports incl. customs clearance
- › Storage
- › Assembly of individual parts
- › Ready-for-sale delivery service

WALKING FLOOR LOGISTICS

- › Trade and bulk transport of waste wood and recycling products such as wood chips, sawdust, wood shavings and matured timber

CAR LOGISTICS

ADDITIONAL BENEFITS THANKS TO VALUE-ADDED SERVICES

For more than 50 years, international and national transports of passenger cars and commercial vehicles from production plants and seaports to Switzerland have been part of our core business. In addition to the transport and storage of new and used cars, rental cars, leased vehicles and company fleets, Galliker offers a wide range of additional services.

- › PDI (Pre-Delivery Inspection)
- › Technical preparation
- › Equipment and provision of special series
- › Vehicle lettering and wrapping
- › Expertise and reconditioning of used cars
- › Car body and paint work
- › Optical preparation
- › Photography to support sales
- › Repair of high-voltage batteries
- › Repair of wheel rims
- › Home delivery for private and corporate customers
- › Transport and reconditioning in the field of wheel
- › Caterpillar logistics and much more

Corinne Galliker

Head of Sales & Marketing,
Galliker Transport AG

Thanks to the active exchange with our customers, new ideas, exciting concepts and opportunities arise for the continuous development of our services.

Mobility is undergoing major changes. Vehicles with alternative drive systems are very much in vogue. At the same time, new mobility needs are developing. Car-sharing concepts, short-time leasing and vehicle rental are steadily gaining in importance. We have always recognised new trends at an early stage and proactively developed our service offerings and aligned ourselves with the needs of our customers.

THE HUMAN AT THE CENTRE

Transport and logistics processes are subject to constant change in relation to customers and product requirements. Simultaneously, legal regulations as well as technological advances are changing. To ensure that we can offer our customers competent expertise and services in the best quality also in the future, we rely on the versatile training and further education of our employees.

APPRENTICESHIP TRAINING

Galliker has been particularly committed to promoting young talents for many years. Around 100 talented young people are being trained at Galliker in 12 different professions and prepared for a promising future.

- › Road transport specialist EFZ
- › Automotive mechatronics technician NF EFZ
- › Road haulage practitioner EBA
- › Automotive technician NF EFZ
- › Car body mechanic EFZ
- › Automotive assistant EBA
- › Car body painter EFZ
- › Vehicle fitter EFZ
- › Media technician EFZ
- › Commercial clerk EFZ
- › Computer scientist EFZ
- › Logistics technician EFZ

MOVING BIG THINGS TOGETHER

GALLIKER TALENTS

GALLIKER CAMPUS

The Galliker Campus with the Transport Academy, the Logistics Academy and the Driver Academy internal, practice-oriented training and development for employees and newcomers. Our employees are being trained and qualified requirements and tasks. In doing so, we promote innovative, sustainable and efficient ways to solve problems.

With our e-learning platform and the active exchange with our customers we achieve efficient knowledge management in all our service areas. Thanks to our apprenticeship training and our Galliker Campus, we can train our employees professionally and specifically, develop them further, assign them exciting responsibilities and keep them up to date.

CONTINUOUS IMPROVEMENT PROCESS

By involving all employees, we want to improve continuously and develop sustainably. Our goals are: Uncovering inefficiency, identifying errors in the processes, considering our employees' ideas, questioning customer complaints, localising disruptive factors in the daily routine.

Transport Academy

Logistics Academy

GALLIKER GREEN LOGISTICS

SUSTAINABLE LOGISTICS

As a responsible family business, now in its third generation, we are committed to sustainable business operations and a respectful treatment of environment and nature.

With "Green Logistics by Galliker", we are pursuing the goal of reducing negative impacts on the environment and the consumption of non-renewable resources in our logistics processes.

With clean technologies and good concepts, people with foresight and an awareness of sustainable business practices - that's how we we can achieve it together.

2017 and 2020
Swiss Solar Prize

Peter Galliker sen.
Galliker Transport AG

It has always been a self-evident matter for us to rely on the latest technologies and to emphasise sustainability when we build our logistics infrastructure and invest in vehicles.

ENVIRONMENTALLY CONSCIOUS ON THE ROAD

Green Logistics by Galliker has given us a new dimension in logistics thinking. Today, we are fully convinced that our transport and logistics activities should be even more environmentally friendly and that we should continuously reduce the consumption of non-renewable energy.

Respectful, sustainable treatment of nature and the environment has been part of our guiding principle for generations.

It is our great goal to be on the road for our customers in a CO₂-neutral in the shortest possible time in cooperation with sustainability-oriented partners.

GALLIKER – KNOWN FOR QUALITY

Motivated and customer-oriented employees, clean, tidy and safe workplaces as well as state-of-the-art infrastructure and a modern fleet of vehicles are all part of Galliker's well-known quality standards. In addition, our customers and our employees appreciate our straightforwardness and the short decision-making processes. We live according to the following principles to maintain our quality standards at all times:

OCCUPATIONAL SAFETY

The safety and health of our employees is our top priority. Accordingly, we follow the officially applicable guidelines for occupational safety and, with the company's internal GoSafe concept, strive for a sustainable, continuous reduction in the number of accidents as well as the improvement of the safety awareness of each individual.

QUALITY ASSURANCE

Certified management systems ensure transparent, systematic, target-oriented processes and their ongoing optimisation.

PRODUCT SAFETY

All requirements of customers and legislation with regard to the safety of foodstuffs, pharmaceuticals and medical products as well as other goods such as non-food and vehicles are decisive for our systems designed for this purpose. Hygiene, cleanliness and order are particularly important to us.

OUR SUSTAINABILITY MANAGEMENT SYSTEMS

- ✓ Energy and material balance
- ✓ Environmental impact analysis
- ✓ Continuous improvement process (MARE)
- ✓ Annual targets for energy efficiency and climate protection

Natalie Robyn

Managing Director, Volvo Car Switzerland AG

We have maintained a very good and long-standing partnership with Galliker, both internationally and nationally. The service and cooperation are professional and at the same time we appreciate the personal contact with the family-run company. In addition, they are working on innovative solutions such as Green Logistics for a sustainable future – which brings us closer to Volvo's ambitious goals of becoming a climate-neutral company.

Ulrike Dannecker

Head of Supply Chain Management & Logistics, B. Braun Medical AG

B. Braun Medical AG appreciates not only the many years of exceptional quality in all areas (from warehouse to transport), but also the very constructive, solution-oriented and human cooperation. It's fun to constantly develop together.
